WESTSIDE FIRE SERVICES

CARING AND RESPONSIVE FOR 30 YEARS

CHIEF WARDEN TRAINING

Your emergency training needs are specific to you, the nature of your business, the environment in which you work, the equipment you operate and the personnel you work with. Since commencing operations in 1984 Westside Fire Services has positioned itself to be recognised as the industry leader in delivering emergency training, by utilizing the most highly regarded training team within Western Australia

Our Training Team members are supported by some of the most innovative technological solutions within the Industry which aid in training delivery. Our staff have numerous years experience in the Emergency Response field which is supported by qualifications in safety, training, fire engineering and emergency management.

CHIEF WARDEN TRAINING

Our Chief Warden Training is targeted towards the members of your sites Emergency Control Organisation leadership team and is delivered in compliance with Australian Standard AS 3745 and your Emergency Response Procedures. The training has a strong focus on command and control of emergency situations. The training covers the following topics:

- *Legislative Requirements and Australian Standard AS 3745*
- *Emergency Control Organisation Command and Control*
- *Chief Warden Duties and Responsibilities*
- *Initiating a Response to an Emergency*
- *Operating installed Occupant Warning System*
- *Utilising an Incident Control Log*
- *Managing Mobility Impaired Occupants*
- *Interacting with Emergency Services*

The training is delivered at your premises for a maximum of 10 trainees per group. The course is theory and practical based and the duration is 1-1.5 hours.
