

FIRE EQUIPMENT TRAINING

Your emergency training needs are specific to you, the nature of your business, the environment in which you work, the equipment you operate and the personnel you work with. Since commencing operations in 1984 Westside Fire Services has positioned itself to be recognised as the industry leader in delivering emergency training by utilizing the most highly regarded training team within Western Australia.

Our Training Team members are supported by some of the most innovative technological solutions within the Industry which aid in training delivery. Our staff have numerous years experience in the Emergency Response field which is supported by qualifications in safety, training, fire engineering and emergency management.

FIRE EQUIPMENT TRAINING

Our Fire Equipment Training is targeted towards all staff with a strong focus on safely suppressing a fire using portable fire equipment including fire extinguishers, hose reels and fire blankets. The training covers the following topics:

- *Fire Science*
- *Classes of Fire*
- *Extinguishing Agents/Types*
- *Safe use of Fire Extinguishers*
- *Safe use of Fire Hose Reels and Fire Blankets*
- *Practical Hands on training for each Trainee on real fires*

The training is delivered at your premises for a maximum of twenty (20) trainees per group. To ensure the best possible learning outcomes for trainees a mixture of theory and practical training delivery is utilised over the 1.5 hour period of training.
