

HEALTHCARE EMERGENCY RESPONSE TRAINING

Your emergency training needs are specific to you, the nature of your business, the environment in which you work, the equipment you operate and the personnel you work with. Since commencing operations in 1984 Westside Fire Services has positioned itself to be recognised as the industry leader in delivering emergency training, by utilizing the most highly regarded training team within Western Australia.

Our Training Team members are supported by some of the most innovative technological solutions within the Industry which aid in training delivery. Our staff have numerous years experience in the Emergency Response field which is supported by qualifications in safety, training, fire engineering and emergency management.

HEALTHCARE EVACUATION TRAINING

Our Healthcare Evacuation training is targeted towards all staff working within the healthcare sector and is delivered in compliance with Australian Standards AS 3745 and/or AS 4083 and your Emergency Response Procedures. The training has a strong focus on life safety plus evacuating patients in emergency situations and covers the following topics:

- *Legislative Requirements, Australian Standards AS 3745 & AS 4083*
- *Emergency Control Organisation Structure, Duties and Responsibilities*
- *Movement/Evacuation of Non-Ambulatory Occupants*
- *Stages of Evacuation*
- *Emergency Types, their Impact & Colour Codes*
- *Raising the Alarm*
- *Fire Alarm systems*
- *Assembly Area/s*

The training is delivered at your site for a maximum of thirty (30) trainees per group. The course is theory and practical based and the duration is 1.5 hours.
